ART LEAD

My passion and enthusiasm for art stems from memories when I was at primary school and secondary school. Art is my favorite subject and it's a subject that my siblings have all enjoyed too. My family members have all been good at art and this had a positive influence on me. For my GCSE and A-levels I choose art, where I was able to look at different artists and get influenced by their work.

I believe that art and design promotes creativity and imagination. It provides visual, sensory experiences, and a special way of understanding and responding to the world. It enables children to communicate what they see, feel and think, through the use of colour, texture, form, pattern and different materials and processes. It enables children to express their emotions through art.

Arts help children to understand the world around them in many ways. They learn to make informed judgements, and artistic and practical decisions. They discover ideas and meanings through the work of artists and designers. Through learning about the roles and functions of art, they can explore the impact it has had on contemporary life and on different periods and cultures.

It has been amazing to see how art has progressed at Dunstall Hill Primary School, during the time I was maternity leave. During my return I have been able to see how the whole school is following the PKC scheme. I have also been able to see childrens work in sketch books which looks a lot more presentable and its nice that the children have a separate art book which they take pride in when doing creative work.
