

## **Dunstall Hill Primary School – Long Term Mathematics Plans**

## Purpose of study

Mathematics is a creative and highly inter-connected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. It is essential to everyday life, critical to science, technology, and engineering, and necessary in most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, and a sense of enjoyment and curiosity about the subject.

## Aims

The National Curriculum for mathematics aims to ensure that all pupils:

- ✓ become **fluent** in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils have conceptual understanding and are able to recall and apply their knowledge rapidly and accurately to problems.
- reason mathematically by following a line of enquiry, conjecturing relationships, and generalisations, and developing an argument, justification or proof using mathematical language.
- can solve problems by applying their mathematics to a variety of routine and non- routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

## The principal focus of mathematics teaching

E 1	<ul> <li>The principal focus of mathematics teaching in key stage 1 is to ensure that pupils develop confidence and mental fluency with whole numbers, counting and place value. This should involve working with numerals, words and the four operations, including with practical resources [for example, concrete objects and measuring tools].</li> </ul>
KEY STAGE	<ul> <li>At this stage, pupils should develop their ability to recognise, describe, draw, compare and sort different shapes and use the related vocabulary. Teaching should also involve using a range of measures to describe and compare different quantities such as length, mass, capacity/volume, time and money.</li> </ul>
KEY	<ul> <li>By the end of year 2, pupils should know the number bonds to 20 and be precise in using and understanding place value. An emphasis on practice at this early stage will aid fluency.</li> </ul>
	• Pupils should read and spell mathematical vocabulary, at a level consistent with their increasing word reading and spelling knowledge at key stage 1.
E 2	<ul> <li>The principal focus of mathematics teaching in lower key stage 2 is to ensure that pupils become increasingly fluent with whole numbers and the four operations, including number facts and the concept of place value. This should ensure that pupils develop efficient written and mental methods and perform calculations accurately with increasingly large whole numbers.</li> </ul>
LOWER KEY STAGE	<ul> <li>At this stage, pupils should develop their ability to solve a range of problems, including with simple fractions and decimal place value. Teaching should also ensure that pupils draw with increasing accuracy and develop mathematical reasoning so they can analyse shapes and their properties, and confidently describe the relationships between them. It should ensure that they can use measuring instruments with accuracy and make connections between measure and number.</li> </ul>
OWER	<ul> <li>By the end of year 4, pupils should have memorised their multiplication tables up to and including the 12 multiplication table and show precision and fluency in their work.</li> </ul>
ΓC	<ul> <li>Pupils should read and spell mathematical vocabulary correctly and confidently, using their growing word reading knowledge and their knowledge of spelling.</li> </ul>
E 2	<ul> <li>The principal focus of mathematics teaching in upper key stage 2 is to ensure that pupils extend their understanding of the number system and place value to include larger integers. This should develop the connections that pupils make between multiplication and division with fractions, decimals, percentages and ratio.</li> </ul>
UPPER KEY STAGE	<ul> <li>At this stage, pupils should develop their ability to solve a wider range of problems, including increasingly complex properties of numbers and arithmetic, and problems demanding efficient written and mental methods of calculation. With this foundation in arithmetic, pupils are introduced to the language of algebra as a means for solving a variety of problems. Teaching in geometry and measures should consolidate and extend knowledge developed in number. Teaching should also ensure that pupils classify shapes with increasingly complex geometric properties and that they learn the vocabulary they need to describe them.</li> </ul>
UPP	<ul> <li>By the end of year 6, pupils should be fluent in written methods for all four operations, including long multiplication and division, and in working with fractions, decimals and percentages.</li> </ul>
	<ul> <li>Pupils should read, spell and pronounce mathematical vocabulary correctly.</li> </ul>

MATHEMATICS – end of year standards for Year 1				
Numb	ber and Place Value	Addition and Subtraction	Multiplication and Division	Fractions
<ul> <li>backwards, beg given number; any given a nur</li> <li>Count in twos, multiples <i>e.g. 6</i></li> <li>Count, read, w 100 in numeral</li> <li>Begin to recogr beyond 20</li> <li>Identify and re and pictorial re number line</li> </ul>	fives and tens from different 6, 8, 10, 12, 14 <b>Prite</b> and <b>compare</b> numbers to Is nise <b>place value</b> in numbers <b>epresent</b> numbers using objects epresentations including the <b>age</b> of: equal to, more than, less	<ul> <li>Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs</li> <li>Use number bonds and related subtraction facts within 20 e.g. 9 + 7 = 16; 16 - 7 = 9; 7 = 16 - 9</li> <li>Add and subtract one-digit and two-digit numbers to 20 including zero</li> <li>Solve simple one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = □ - 9</li> </ul>	<ul> <li>Begin to understand multiplication and division through grouping and sharing small quantities; doubling numbers and quantities, and finding simple fractions of objects, numbers and quantities</li> <li>Solve simple one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher</li> </ul>	<ul> <li>Recognise, find and name:         <ul> <li>a half as one of two equal parts of an object, shape or quantity</li> <li>a quarter as one of four equal parts of an object, shape or quantity</li> </ul> </li> <li>Connect halves and quarters to the equal sharing</li> </ul>
	e numbers from 1 to 20 in words Measurement	Geometry: properties of shapes	Geometry: position and direction	Statistics
<ul> <li>length longer</li> <li>mass lighter</li> <li>capace /less t</li> <li>capace</li> <li>capace</li> <li>time e</li> <li>Measure and beg</li> <li>lengths a</li> <li>mass/we</li> <li>capacity a</li> <li>time (hou</li> <li>Use non-standar standard units</li> <li>Recognise and kn denominations o</li> <li>Totalling amount</li> <li>Sequence events language e.g. bef yesterday, tomor</li> <li>Recognise and us including days of</li> <li>Tell the time to t</li> </ul>	and heights	<ul> <li>Recognise and name common 2-D and 3-D shapes (in different orientations and sizes), including:         <ul> <li>2-D shapes e.g. rectangles (including squares), circles and triangles</li> <li>3-D shapes e.g. cuboids (including cubes), pyramids and spheres</li> </ul> </li> </ul>	<ul> <li>Describe position, directions and movements, including whole, half, quarter and three- quarter turns. (using language such as left and right, forwards and backwards)</li> </ul>	No statutory requirements

	MATHEMATICS – end of year standards for Year 2					
	Number and Place Value	Addition and Subtraction	Multiplication and Division	Fractions		
Bv the end of Y2 pupils will be able to	<ul> <li>using different representations, including the number line and arrays</li> <li>Compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs</li> <li>Read and write numbers to at least 100 in numerals and in words</li> <li>Use place value and number facts to solve problems</li> </ul>	<ul> <li>Solve problems with addition and subtraction:         <ul> <li>using concrete objects and pictorial representations, involving numbers, quantities and measures</li> <li>applying knowledge of mental and written methods</li> </ul> </li> <li>Recall and use addition and subtraction facts to 20 fluently, derive and use related facts up to 100 <i>e.g.</i> 3 + 7 = 10, 10 - 7 = 3 and 7 = 10 - 3 to calculate 30 + 70 = 100, 100 - 70 = 30 and 70 = 100 - 30</li> <li>Add and subtract numbers using concrete objects, pictorial representations, and mentally, including:</li></ul>	<ul> <li>Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers</li> <li>Calculate multiplication and division statements within the 2, 5 and 10 multiplication tables and write them using the multiplication (×), division (÷) and equals (=) signs</li> <li>Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot</li> <li>Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts</li> </ul>	<ul> <li>Recognise, name and write simple fractions 1/3, 1/4, 2/4 and 3/4</li> <li>Find fractions 1/3, 1/4, 2/4 and 3/4 of sets of objects or shapes, quantities, lengths <i>e.g.</i> 1/2 of 6 = 3</li> <li>Recognise the equivalence of 2/4 and 1/2</li> <li>Count in fractions <i>e.g.</i> 11/4, 12/4, (or 11/2), 13/4</li> </ul>		
	Measurement	Geometry: properties of shapes	Geometry: position and direction	Statistics		
By the end of Y2 pupils will be able to	<ul> <li>Totalling amounts of money involving all coins and notes</li> <li>Combine amounts to make a particular value</li> <li>Find different combinations of coins that equal the same amounts of money</li> <li>Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (recording pounds and pence separately)</li> <li>Compare and sequence intervals of time</li> </ul>	<ul> <li>Identify and describe the properties of 2-D shapes, (e.g. pentagons, hexagons, octagons), including number of sides or vertices, symmetry in a vertical line</li> <li>Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces</li> <li>Identify 2-D shapes on the surface of 3-D shapes, e.g. a circle on a cylinder and a triangle on a pyramid</li> <li>Compare and sort common 2-D and 3-D shapes and everyday objects</li> </ul>	<ul> <li>Order and arrange combinations of mathematical objects in patterns and sequences</li> <li>Use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise) <i>e.g. pupils</i> themselves moving in turns, programming robots using instructions given in right angles</li> </ul>	<ul> <li>Interpret and construct simple pictograms (symbol representing 2, 5, 10), tally charts, block diagrams and simple tables</li> <li>Ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity</li> <li>Ask and answer questions about totalling and compare categorical data, <i>e.g. how many?</i> <i>How many more/fewer?</i></li> </ul>		

	MATHEMATICS – end of year standards for Year 3				
	Number and Place Value	Addition and Subtraction	Multiplication and Division	Fractions	
By the end of Y3 pupils will be able to	<ul> <li>Count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number</li> <li>Read and write numbers to at least 1000 in numerals and in words</li> <li>Recognise the place value of each digit in a three-digit number (hundreds, tens, ones)</li> <li>Compare and order numbers up to 1000</li> <li>Identify, represent and estimate numbers using different representations including measures e.g. on number lines and measuring scales</li> <li>Solve number problems and practical problems involving these ideas.</li> </ul>	<ul> <li>Add and subtract ones, tens and hundreds to or from three-digit numbers mentally; two two-digit numbers where the answers could exceed 100 <i>e.g.</i> 78 + 46</li> <li>Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction</li> <li>Estimate the answer to a calculation and use inverse operations to check answers</li> <li>Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction.</li> </ul>	<ul> <li>Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables</li> <li>Write and solve multiplication and division calculations using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to efficient written methods <i>e.g.</i> 27 x 3, 81 ÷ 3</li> <li>Solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems (<i>e.g. scaling up or down a recipe for 4 people</i>) and correspondence problems in which n objects are connected to m objects <i>e.g.3 hats and 4 coats, how many outfits</i>?</li> </ul>	<ul> <li>Count up and down in tenths; recognise how tenths arise by dividing by 10</li> <li>Recognise, find and write fractions of a set of objects (unit and non-unit fractions linking to know tables) <i>e.g.</i> 2/3 of 24</li> <li>Recognise and show equivalent fractions with small denominators e.g. 2/6 = 1/3 (using diagrams)</li> <li>Add and subtract fractions with the same denominator within one whole <i>e.g.</i> 5/7 + 1/7 = 6/7</li> <li>Compare and order unit fractions, and fractions with the same denominators</li> <li>Solve problems that involve all of the above.</li> </ul>	
	<ul> <li>Recognise how tenths arise by dividing by 10</li> </ul>				
	Measurement	Geometry: properties of shapes	Geometry: position and direction	Statistics	
By the end of Y3 pupils will be able to	<ul> <li>Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)</li> <li>Measure the perimeter of simple 2-D shapes</li> <li>Add and subtract amounts of money to give change, using both £ and p in practical contexts <i>e.g.</i> £297 + £106, 86p - 47p (The decimal recording of money is introduced formally in year 4)</li> <li>Use both analogue (including using Roman numerals from 1 to XII) and digital clocks to tell the time to the nearest minute using 12-hour and 24- hour clocks</li> <li>Estimate and read time with increasing accuracy to the nearest minute;</li> <li>Record and compare time in terms of seconds, minutes and hours</li> <li>Use time vocabulary <i>e.g. a.m./p.m., morning,</i> <i>afternoon, noon, midnight</i></li> <li>Know and use relevant time facts <i>e.g. seconds in a</i> <i>minute, number of days in each month, year and</i> <i>leap year</i></li> <li>Compare durations of events <i>e.g. calculate the time</i> <i>taken by particular events or tasks i.e. running races</i></li> </ul>	<ul> <li>Draw 2-D shapes accurately using a ruler</li> <li>Make, recognise and describe 3-D shapes in different orientations</li> <li>Recognise that angles are a property of shape or a description of a turn</li> <li>Use right angles as a marker for comparison e.g. two right angles make a half-turn, four a complete turn; identify whether angles are greater than or less than a right angle</li> <li>Identify horizontal and vertical lines and pairs of perpendicular and parallel lines</li> <li>Identify symmetry in a horizontal and vertical line</li> <li>Complete a simple symmetric figure with horizontal or vertical lines of symmetry</li> </ul>	No statuary requirements	<ul> <li>Interpret and present data using bar charts, pictograms and tables <i>e.g. using scales with increments of 2, 5 and 10</i></li> <li>Solve one-step and two-step questions <i>e.g. 'How many more?' and 'How many fewer?'</i></li> </ul>	

MATHEMATICS – end of year standards for Year 4					
Number and Place Value		Addition and Subtraction	Multiplication and Division	Fractions (including decimals)	
	<ul> <li>Count in multiples of 6, 7, 9, 25 and 1000; finding 1000 more or less than a given number e.g. 1000 more/less than 2467, 1078</li> </ul>	using <b>mental strategies</b> and the <b>formal</b>	<ul> <li>Recall multiplication and division facts for multiplication tables up to 12 × 12</li> </ul>	<ul> <li>Recognise and show, using diagrams, families of common equivalent fractions</li> </ul>	
By the end of Y4 pupils will be able to	<ul> <li>Recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)</li> <li>Order and compare numbers beyond 1000</li> <li>Compare numbers with the same number of decimal places up to two decimal places</li> <li>Identify, represent and estimate numbers using different representations e.g. on number lines and scales</li> <li>Round any number to the nearest 10, 100 or 1000</li> <li>Round decimals with one decimal place to the nearest whole number</li> <li>Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the place value of the digits in the answer as ones, tenths and hundredths; start to use decimal notation</li> <li>Recognise that hundredths arise when dividing an object by a hundred and dividing tenths by ten</li> <li>Count backwards through zero to include negative numbers</li> <li>Solve number and practical problems that involve all of the above</li> <li>Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value (historical context).</li> </ul>	<ul> <li>written methods of columnar addition and subtraction where appropriate</li> <li>Estimate and use inverse operations to check answers to a calculation</li> <li>Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.</li> </ul>	<ul> <li>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers <i>e.g.</i> 2 x 6 x 9 and 600 ÷ 3</li> <li>Recognise and use factor pairs and commutativity in mental calculations <i>e.g.</i> 40 x 7= 10 x 4 x 7 = 10 x 28 = 280, since 40 has a factor pair of 4 and 10; <i>e.g.</i> 2 x 6 x 9 = 2 x 54 = 108</li> <li>Multiply two-digit and three-digit numbers by a one-digit number using formal written layout <i>e.g.</i> 84 x 6, 134 x 7</li> <li>Solve problems involving multiplying and adding, including using the distributive law (<i>e.g.</i> 39 x = 30x7 + 9x7) to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as which n objects are connected to m objects <i>e.g.</i> the number of choices of a meal on a menu.</li> </ul>	<ul> <li>Count up and down in hundredths; recognise that hundredths arise when dividing an object by a hundred and dividing tenths by ten</li> <li>Find fractions of amounts and quantities, use fractions to divide quantities, including non-unit fractions where the answer is a whole number <i>e.g.</i> <sup>3</sup>/<sub>8</sub> of £48 and <sup>5</sup>/<sub>6</sub> of 180</li> <li>Add and subtract fractions with the same denominator (over 1 whole) e.g. <sup>5</sup>/<sub>7</sub> + <sup>4</sup>/<sub>7</sub> = <sup>9</sup>/<sub>7</sub></li> <li>Recognise and write decimal equivalents of any number of tenths or hundredths and decimal equivalents to <sup>1</sup>/<sub>4</sub>; <sup>1</sup>/<sub>2</sub>; <sup>3</sup>/<sub>4</sub></li> <li>Solve simple measure and money problems involving fractions and decimals to two decimal places.</li> </ul>	
	Measurement	Geometry: properties of shapes	Geometry: position and direction	Statistics	
By the end of Y4 pupils will be able to	<ul> <li>Convert between different units of measure [e.g. km to m; hour to minute]</li> <li>Measure and calculate the perimeter of a rectilinear figure (shapes with right-angled corners) in centimetres and metres</li> <li>Find the area of rectilinear shapes by counting squares</li> <li>Estimate, compare and calculate different measures, including money in pounds and pence (using decimal notation)</li> <li>Read, write and convert time between analogue and digital 12 and 24-hour clocks</li> <li>Solve problems involving converting units of time e.g. hours to minutes; minutes to seconds; years to months; weeks to days.</li> </ul>	<ul> <li>Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes</li> <li>Identify acute and obtuse angles and compare and order angles up to 180°</li> <li>Identify lines of symmetry in 2-D shapes presented in different orientations</li> <li>Complete a simple symmetric figure with respect to a specific line of symmetry.</li> </ul>	<ul> <li>Read, write and use pairs of co-ordinates in the first quadrant to describe positions <i>e.g.</i> (2,5)</li> <li>Describe movements between positions as translations of a given unit to the left/right and up/down</li> <li>Plot specified points and draw sides to complete a given polygon.</li> </ul>	<ul> <li>Interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs <i>e.g. with scales with increments of 25, 50, 0.1</i></li> <li>Solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.</li> </ul>	

	MATHEMATICS – end of year standards for Year 5				
	Number and Place Value	Addition and Subtraction	Multiplication and Division	Fractions (including decimals and percentages)	
By the end of Y5 pupils will be able to	<ul> <li>Read, write, order and compare numbers to at least 1 million and determine the value of each digit</li> <li>Read, write, order and compare numbers with up to 3 decimal places</li> <li>Multiply and divide whole numbers and decimals by 10, 100 and 1000</li> <li>Count forwards or backwards in steps of powers of 10 for any given number up to 1 million</li> <li>Round any number up to 1 million to the nearest 10, 100, 1000, 10 000 and 100 000</li> <li>Interpret negative numbers in context, count forwards and backwards with positive and negative whole number through zero</li> <li>Solve number problems and practical problems that involve all of the above</li> <li>Read Roman numerals to 1000 (M) and recognise years written in Roman numerals</li> <li>Round decimals with 2 decimal places to the nearest whole number and to 1 decimal place</li> </ul>	<ul> <li>Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)</li> <li>Add and subtract numbers with up to 3 decimal places, using formal written methods (columnar addition and subtraction)</li> <li>Add and subtract numbers mentally with increasingly large numbers <i>e.g.</i> 12462 – 2300 = 10162</li> <li>Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy</li> <li>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> </ul>	<ul> <li>Identify multiples and factors, finding all factor pairs of a number, and common factors of two numbers</li> <li>Recall prime numbers up to 19 and establish whether a number up to 100 is prime; use appropriate vocabulary</li> <li>Multiply numbers up to 4 digits by a 1 digit number using a formal written method <i>e.g. 3721 x 7</i></li> <li>Multiply one-digit numbers with up to three decimal places by whole numbers</li> <li>Multiply numbers up to 4 digits by 2-digit number using a formal written method <i>e.g. 3721 x 37</i></li> <li>Multiply numbers up to 4 digits by 2-digit number using a formal written method <i>e.g. 3721 x 37</i></li> <li>Multiply numbers up to 4 digits with up to 3 decimal places by a 1 digit number using a formal written method <i>e.g. 3721 x 37</i></li> <li>Multiply numbers up to 4 digits by a one-digit number using a formal written method <i>e.g. 3243.4 x 6</i></li> <li>Multiply and divide mentally using known facts</li> <li>divide numbers up to 4 digits by a one-digit number using the formal written method and interpret remainders</li> <li>Divide numbers up to 4 digits with up to 3 decimal places by a one-digit number using the formal written method and interpret remainders</li> <li>Divide numbers up to 4 digits with up to 3 decimal places by a one-digit number using the formal short written method</li> <li>Recognise and use square and cube numbers, and the notation squared (<sup>2</sup>) and cubed (<sup>3</sup>)</li> <li>Solve problems involving multiplication and division including</li> <li>Knowledge of factors, multiples, squares, cubes</li> <li>Scaling by simple fractions</li> <li>Simple rates.</li> <li>Solve problems all four operations and a combination of these, including understanding the meaning of the equals sign <i>e.g.</i> 13 + 24 = 12 + 25, 33 = 5 x □</li> </ul>	<ul> <li>Compare and order fractions whose denominators are all multiples of the same number</li> <li>Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths</li> <li>Recognise mixed numbers and improper fractions, convert from one form to the other, write statements &gt; 1 as a mixed number <i>e.g.</i> <sup>2</sup>/<sub>5</sub> + <sup>4</sup>/<sub>5</sub> = <sup>6</sup>/<sub>5</sub> = 1<sup>1</sup>/<sub>5</sub></li> <li>Add and subtract fractions with the same denominator and multiples of the same number</li> <li>Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams</li> <li>Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents</li> <li>Solve problems involving number up to 3 decimal places</li> <li>Recognise the per cent symbol (%) and understand that per cent relates to "number of parts per hundred", and write percentages as a fraction with denominator hundred, and as a decimal</li> <li>Solve problems which require knowing percentage and decimal equivalents of 1/<sub>2</sub>, 1/<sub>4</sub>, 1/<sub>5</sub>, 2/<sub>5</sub>, 4/<sub>5</sub> and those with a denominator of a multiple of 10 or 25.</li> </ul>	
	Measurement	Geometry: properties of shapes	Geometry: position and direction	Statistics	
By the end of Y5 pupils will be able to	<ul> <li>Convert between different units of measure (e.g. km and m; cm and m; cm and mm; g and kg; l and ml)</li> <li>Use all four operations to solve problems involving measure e.g. length, mass, volume, money, using decimal notation including scaling</li> <li>Understand and use basic equivalences between metric units and common imperial units such as inches, pounds and pints</li> <li>Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres</li> <li>Calculate and compare the area of rectangles (including squares), including using standard units, square centimetres (cm<sup>2</sup>) and square metres (m<sup>2</sup>) and estimate the area of irregular shapes</li> <li>Estimate volume e.g. using 1 cm<sup>3</sup> blocks to build cuboids (including cubes) and capacity e.g. using water</li> <li>Solve problems involving converting between units of time e.g. days to weeks, expressing the answer as weeks and days</li> </ul>	<ul> <li>Identify 3-D shapes, including cubes and cuboids, from 2-D representations</li> <li>Know angles are measured in degrees; estimate and compare acute, obtuse and reflex angles</li> <li>Draw given angles and measure them in degrees (°)</li> <li>identify: <ul> <li>angles at a point and one whole turn (total 360°)</li> <li>angles at a point on a straight line and a half turn (total 180°)</li> <li>other multiples of 90°</li> </ul> </li> <li>Use the properties of rectangles to deduce related facts and find missing lengths and angles; use the term diagonal</li> <li>Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.</li> </ul>	<ul> <li>Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.</li> <li>Read, write and use pairs of co-ordinates in the first and second quadrant to describe positions <i>e.g. (2,5) (1 lesson- building on Y4)</i></li> </ul>	<ul> <li>Solve comparison, sum and difference problems using information presented in line graphs</li> <li>Complete, read and interpret information in tables, including timetables</li> </ul>	

		Γ	MATHEMATICS – end of year standards f	or Year 6	
	Number and Place Value         Addition, Subtraction, Multiplication and Division			Fractions (decimals and percentages)	
of Y6 pupils will be able to	<ul> <li>Use negative numbers in context, and calculate intervals across zero e.g5 + 7</li> <li>Solve number and practical problems that involve all of the above</li> <li>Identify the value of each digit to 3 decimal places</li> <li>Multiply and divide numbers by 10, 100 and 1000 with answers up to 3</li> </ul>	<ul> <li>method of long multiplicat</li> <li>Divide numbers up to 4 dig division, and interpret rem appropriate for the contex -short division</li> <li>long division</li> <li>Perform mental calculation</li> <li>Identify common factors, c</li> <li>Use knowledge of the orde <i>e.g.</i> 2 + 1 x 3 = 5 and (2 + 1)</li> <li>Solve addition, subtraction which operations and meti</li> <li>Use estimation to check ar levels of accuracy.</li> </ul>	<ul> <li>Compare and order fractions, including fractions &gt;</li> <li>Add and subtract fractions with different denomine the concept of equivalent fractions.</li> <li>Add and subtract fractions with different denomine the concept of equivalent fractions.</li> <li>Multiply simple pairs of proper fractions, writing the 1/4 x 1/2 = 1/8.</li> <li>Divide proper fractions by whole numbers <i>e.g.</i> 1/3.</li> <li>Associate a fraction with division to calculate decire 0.375] for a simple fraction <i>e.g.</i> 3/8.</li> <li>Solve problems, which require answers to be roun accuracy.</li> <li>Recall and use equivalences between simple fraction including in different contexts.</li> </ul>		ractions >1 t denominators and mixed numbers, using writing the answer in its simplest form <i>e.g.</i> rs <i>e.g.</i> $\frac{1}{3} \div 2 = \frac{1}{6}$ ulate decimal fraction equivalents [e.g. o be rounded to specified degrees of
e end		Alge	ebra	Ratio and	Proportion
By	<ul> <li>Generate and describe linear number sequences</li> <li>Express missing number problems algebraically</li> <li>Find pairs of numbers that satisfy an equation involving two unknowns.</li> <li>Enumerate all possibilities of combinations of two variables</li> </ul>			<ul> <li>the relative sizes of two quantities, where missing values can be found by using integer multiplication and division facts</li> <li>the calculation of percentages [e.g. of measures such as 15% of 360m] and the use of percentages for comparison</li> <li>similar shapes where the scale factor is known or can be found (a:b- quantities, sizes and scale drawings)</li> <li>unequal sharing and grouping using knowledge of fractions and multiples (a:b or as a fractions)</li> </ul>	
	Measurem	ent	Geometry: properties of shapes	Geometry: position and direction	Statistics
By the end of Y6 pupils will be able to	<ul><li>and volume of shapes</li><li>Calculate the area of parallelogra</li></ul>	notation up to three e ween standard units, gth, mass, volume and ure to a larger unit, and n to three decimal places netres ame areas can have sa use the formulae for area ums and triangles volume of cubes and luding centimetre cubed	<ul> <li>Draw 2-D shapes using given dimensions and angles</li> <li>Recognise, describe and build simple 3-D shapes, including making nets</li> <li>Compare and classify geometric shapes based on properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons</li> <li>Illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius</li> <li>Recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles</li> </ul>	<ul> <li>Describe positions on the full coordinate grid (all four quadrants)</li> <li>Draw and translate simple shapes on the coordinate plane, and reflect them in the axes.</li> </ul>	<ul> <li>Interpret and construct pie charts and line graphs and use these to solve problems</li> <li>Calculate and interpret the mean as an average.</li> </ul>
